

# **Unification of the Availability Checking method for Intra prediction (JCTVC-F477)**

---

**Chanyul Kim, Heechul Yang, Youngo Park  
(Samsung)**

# Introduction

- ❖ There are two different available checking methods in the current HM
  - CIP on and CIP off cases.
  - Different coding gain and bit-stream are shown depending on CIP status.
- ❖ Propose unified checking method
- ❖ Cross checked by NEC (JCTVC-F653)
  - The proposal is to be a sort of bug fix about reference sample padding process (ticket #190)
  - They recommended that JCTVC adopts the proposed software bug to next version of HM.

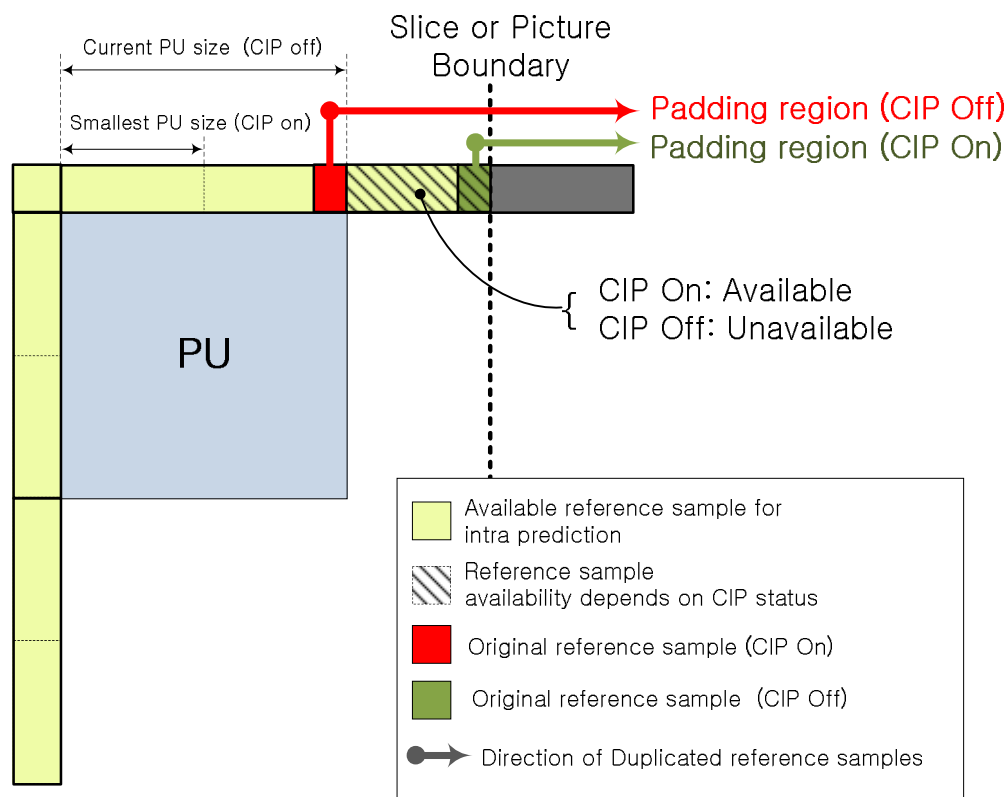

# Availability check method

## ❖ Two availability checking methods for picture or slice boundary

- CIP on: Unit is checked by the smallest PU size.
- CIP off: Unit is checked by the current PU size.

**Smallest PU size**

# Experimental results

## ❖ Results of proposed scheme compared to HM3.0 anchor

	All Intra HE			All Intra LC		
	Y	U	V	Y	U	V
Class A	0.00	0.00	0.00	0.00	0.00	0.00
Class B	0.00	0.00	-0.01	0.00	-0.01	0.00
Class C	0.00	0.00	0.00	0.00	0.00	0.00
Class D	0.00	-0.01	0.00	0.00	0.00	0.00
Class E	0.00	0.00	0.00	0.00	0.00	0.00
Overall	0.00	0.00	0.00	0.00	0.00	0.00
Enc Time[%]	101%			103%		
Dec Time[%]	101%			104%		

## ❖ Results of proposed scheme compared to HM3.0\_dev\_mediatek anchor

### ■ FGS conditions

	All Intra HE			All Intra LC		
	Y	U	V	Y	U	V
Class A	-0.02	-0.10	-0.06	-0.03	-0.07	-0.01
Class B	-0.02	-0.03	-0.05	-0.02	-0.02	-0.02
Class C	-0.01	-0.01	-0.03	-0.01	0.00	0.00
Class D	-0.01	-0.02	-0.01	0.00	-0.01	-0.01
Class E	-0.01	-0.03	-0.02	-0.01	-0.02	-0.03
Overall	-0.01	-0.04	-0.04	-0.01	-0.02	-0.01
Enc Time[%]	101%			102%		
Dec Time[%]	102%			104%		

# Conclusions

- ❖ Unification of available checking method
  - Availability checking and padding methods are consistent regardless of CIP status.
  - Not to mark available pixels to unavailable them.
  
- ❖ Coding efficiency impact:
  - -0.0/-0.0/-0.0% on average
  - More benefit in case of FGS or slice structure.
  
- ❖ The availability checking is recommended for next HM adoption by cross-check
