Presented by Yu-Wen Huang
7th JCT-VC Meeting in Geneva
21-30 November, 2011

Overall Summary

- Proposed new filter shapes:
 - Snowflake5x5 (in HM-4.0)
 - Cross9x9 (replace cross11x9)
- Need the same number of multiplications in the worst case in comparison with HM-4.0.
- 0.1-0.6% bit rate saving
- Increase two line buffers, which can be solved by CE8.c related proposals
