

JCTVC-I0586 Supplemental Slides

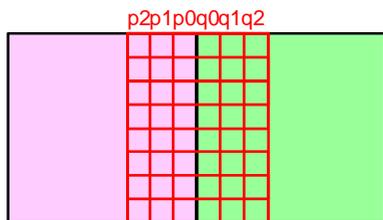

HM-6.0 Deblocking

Regular block

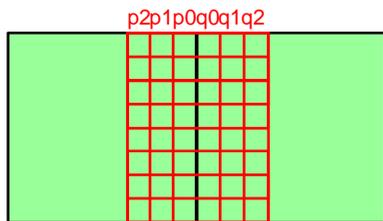

I_PCM/Lossless

$$(QP_P + QP_Q)/2$$

$$(QP_P + 0)/2$$

$$(0 + 0)/2$$

Filtering
 ↓ pcm_loop_filter_disable_flag=1 /
 qp_prime_zero_transquant_bypass_enable_flag=1
 No filtering

Filtering
 ↓ pcm_loop_filter_disable_flag=1 /
 qp_prime_zero_transquant_bypass_enable_flag=1
 No filtering

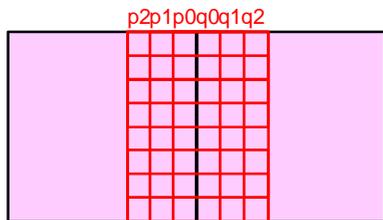

Discrepancy in I_PCM case

Unified Deblocking

Regular block

I_PCM/Lossless

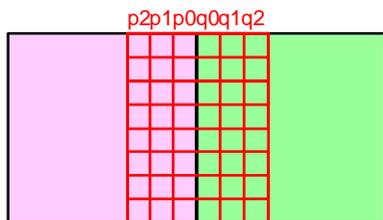

Unified QP derivation

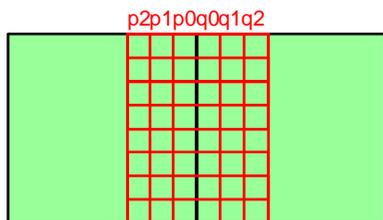

$$(QP_P + QP_Q)/2$$

$$(QP_P + QP_Q)/2$$

$$(QP_P + QP_Q)/2$$

Filtering
 ↓ pcm_loop_filter_disable_flag=1/
 cu_transquant_bypass_enable_flag=1
 No filtering

Filtering
 ↓ pcm_loop_filter_disable_flag=1/
 cu_transquant_bypass_enable_flag=1
 No filtering

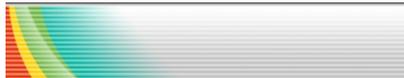

Interaction between I_PCM and cu_transquant_bypass_flag

Restriction

pcm_loop_filter_disable_flag	pcm_flag	cu_transquant_bypass_flag	Filter?
0	0	0	Yes
0	0	1	No
0	1	0	Yes
0	1	1	No
1	0	0	Yes
1	0	1	No
1	1	0	No
1	1	1	No

No restriction

pcm_loop_filter_disable_flag	pcm_flag	cu_transquant_bypass_flag	Filter?
x	0	0	Yes
0	1	0	Yes
1	1	0	No
x	x	1	No
