

JCTVC-J0079
On beyond 8 bit-depth support in HEVC

P. Andrivon, P. Bordes

10th JCTVC Meeting: Geneva, July 11th - 20th, 2012

Bit-depth issues status

HM7.0

Issue w.r.t. bit-depth	Ticket	Fixed in
Intra TS offsets + underflow + typo (≥ 13 -bit)	#560	HM-7.1-dev r2483
WP and IF offsets (14-bit)	#595	HM-7.1-dev r2482
Overflows in RDOQ (14-bit)	#596	HM-7.1-dev r2488
Bit-depth scaling in RDOQ (≥ 10 -bit)	#597	HM-7.1-dev r2481

Draft 7

Issue w.r.t. bit-depth	Ticket	Fixed in
ALF SliceQPy range (≥ 10 -bit)	#466	JCTVC-I1003 d5
Deblocking filter mismatch WD6/HM6 (≥ 10 -bit)	#529	JCTVC-I1003 d2
Intra TS semantic (≥ 13 -bit)	#560	JCTVC-I1003 d3
Weighted Prediction offset (14-bit)	#594	JCTVC-I1003 d6

Experiments: JM18.3 vs HM7.X - 8/10/12/14 bits

Test material

- 6 x 1080p50 SVT, 250 frames

Test Conditions

- JM18.3: « HM-like » RA and AI configuration files
 - Same as in *I0409*
- Software - RA/AI-HE10, 12, 14-bit (JCTVC-I1100)
 - HM7.0/HM7.1 lossy
 - HM7.0 picture-level lossless
- BD-rate (4 QP)

Experiments: Test material

Experiments: Results

JM18.3 vs HM7.1 w/ 14-bit bugfixes (w/o #597) - BD-rate in %

Bitdepth/ GoP	8			10			12			14		
	Y	U	V	Y	U	V	Y	U	V	Y	U	V
AI-HE	-18.1	-31.3	-27.1	-17.7	-30.2	-24.8	-17.3	-29.6	-23.6	-17.1	-28.7	-22.2
RA-HE	-31.3	-50.6	-43.4	-31.8	-47.8	-35.9	-31.4	-46.7	-33.9	x	x	x

x: JM18.3 issues for 5 out of 6 sequences for RA-HE 14 bit test conditions

HM7.0 vs HM7.1 w/ 14-bit bugfixes (w/o #597) - BD-rate in %

GoP	Y	U	V
AI-HE 14-bit	-5.0	-7.2	-8.2
RA-HE 14-bit	-2.4	-5.1	-2.3

Comments

- Coherency across bit-depth comparative tests
- Picture-level lossless in HM7.0 performs perfect reconstruction (8, 10, 12, 14-bit)

Conclusion

Current beyond 8 bit-depth support in HM-7.1-dev:

- Consistent results acrosss bit-depth up to 14-bit
- 16-bit support if commercially justified would be hugely invasive

Picture-level lossless in HM7.0:

- 8, 10, 12, 14-bit: OK

Further studies:

- ALF and Intra LM
- Market needs in terms of bit-depth limit
- Experiments: test LowDelay cases + need of new test material

Suggestion:

- Define time-line for beyond 8 bit-depth (and non-4:2:0 chroma) support
