Consistent Usage of Intra Boundary-Filter Disabling

X. Zhang, K. Zhang, J. An, H. Huang, S. Lei
17th JCT Meeting in Valencia
27 March – 4 April, 2014

Outline

- Background
 - Intra boundary filters in HEVC-RExt.
- Proposed Method 1 and 2
- Experimental Results

Background:

Intra boundary filters in HEVC-RExt

- Intra DC boundary filters
 - Always enabled, no disabling mechanism

- Intra Hor/Ver gradient filters
 - Disabled if
 - `(implicit_rdpcm_enabled_flag && cu_transquant_bypass_flag)`
 - No disabling mechanism under current lossy conditions

Proposed Modifications

- Method 1:
 - **Intra DC** and gradient filters are both disabled under the same derivation of *disableIntraBoundaryFilter*
(implicit_rdpcm_enabled_flag && **cu_transquant_bypass_flag**)
- Method 2:
 - Disabling the Intra boundary filters under new flag control
 - Capability to disable them for **lossy**

Experimental Results (AHG8 CTC)

- Method 1 (lossless)
 - There is 0.2% average bit saving on YUV444 SC set in RA
 - No loss for other videos.

Method 2
